

## FINAL Agenda

### AI-powered Scaling of the EHDS: Data driven value generation at affordable cost online Roundtable discussion

#### **10:00 – 10:15 Tour de table and Context Setting**

Zoi Kolitsi

#### **10:15– 11:00 Delivering Value from EHDS Investments - MS reflections followed by discussion**

**Moderator:** Zoi Kolitsi

This session will invite participants perspectives on the challenges of translating the EHDS Regulation implementation into tangible value, in their national context and plans, including investment priorities and constraints; it will shortlist what needs to be in place to enable value-generating implementation in practice, in terms of core capabilities, including data quality, interoperability and governance across different health system contexts.

#### **11:00 – 12:00 Addressing Bottlenecks: Current and Emerging AI Solutions**

**Moderator:** Isabelle de Zegher

Building on the challenges identified in the previous session, the discussion will explore how the main bottlenecks to value-generating EHDS implementation can be addressed in practice in current and emerging cost-effective approaches. AIDAVA will provide a backdrop for exploring how AI enabled approaches could complement and strengthen data quality and interoperability efforts, to reduce complexity and cost and support scalability across Member States. #### **12:00 – 12:30 Break**

#### **12:30 – 13:15 From Implementation to Value: What needs to be done?**

**Moderator:** Zoi Kolitsi

This part of the discussion will focus on identifying the actions needed to move from EHDS compliance to tangible value for health systems, with particular attention to the opportunities offered by advanced technology innovations to reduce cost and complexity and enhance the usability of health data across care, research and innovation.
